SUMMARY

Software Engineering student at AASTMT (expected 2028) who builds and deploys full-stack web apps with React, TypeScript, Node.js and MongoDB. Completed a six-month Full Stack course at AMIT and an internship at GASCO. Seeking a software engineering internship or part-time role in frontend, backend or full-stack development.

EDUCATION

Bachelor of Science in Software Engineering Expected 2028
Arab Academy for Science, Technology and Maritime Transport (AASTMT)
- Currently in third year.

PROJECTS

Shella: group outing planner for Cairo
Live: shella-cairo.vercel.app
Technologies: Node.js, Express, MongoDB (Mongoose), JavaScript, PWA, Web Push, TensorFlow.js, Playwright, Vercel
- Built and deployed a bilingual English/Arabic (RTL) full-stack app where friend groups join with one code, set their own budgets and vote on a plan from 172 Cairo places and real venues found through OpenStreetMap.
- Developed group chat with polls, reactions and push notifications, plus bill splitting, ratings, photo memories and an owner dashboard.
- Secured it with two-step login, rate limiting, field-level encryption and content moderation (TensorFlow.js image check, reports); covered it with 412 automated end-to-end checks (Playwright).

Ahwa: café finder for students in Cairo
Live: ahwa-cairo.vercel.app | Code: github.com/mahmoudsharks09/ahwa
Technologies: React 19, TypeScript, Vite, Leaflet, React Router, OpenStreetMap
- Built a bilingual English/Arabic (RTL) web app that maps 341 real Cairo cafés from OpenStreetMap data.
- Calculated live open-now status in Cairo time, with filters for Wi-Fi, outdoor seating, air-con, smoking and area.
- Implemented saved cafés and personal notes, and deployed the app on Vercel.

GoMart: e-commerce storefront with admin dashboard
Live: gomart-amit.vercel.app | Code: github.com/mahmoudsharks09/GoMart
Technologies: React 19, Vite, React Router, Bootstrap, React Bootstrap, REST API (DummyJSON)
- Developed a storefront with categories, search, filters, product pages and a cart with live totals.
- Implemented login with role-based access control (Admin, Moderator, Tester) and an admin dashboard with create, read, update and delete (CRUD) for products.
- Integrated product data from the DummyJSON REST API and deployed on Vercel.

EXPERIENCE

Intern, GASCO (Egyptian Natural Gas Company) 2025
- Completed a professional internship and received a certificate of completion.

Freelance Web Developer, Self-employed
- Built and shipped work for real-world requirements.

Full Stack Web Development Course, AMIT 6 months
- Completed a six-month full-stack development training program.

SKILLS

Languages: Java, Python, C, C++, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & Libraries: React, Node.js, Express, React Router, Bootstrap, Leaflet
Tools: Git, GitHub, Vite, Vercel, Playwright, VS Code, IntelliJ IDEA, Figma
Databases: MySQL, MongoDB (Mongoose)
Concepts: REST APIs, responsive design, internationalization (RTL), PWAs, authentication, role-based access control, end-to-end testing

ADDITIONAL INFORMATION

Certifications: GASCO Internship Certificate (2025)
Activities: Google Developer Student Club (GDSC); technical clubs and volunteering
Languages: Arabic (native), English (B2)
